

A PENTHOUSE IN THE
GREEN HEART OF GHENT

Eveline Tytgat showed an artistic spark from a very young age. Both of her parents are architects, and as a child she became a devoted visitor to the art academy. She later pursued secondary education in the arts. Music also played an important role in her life. Growing up in a musical family and receiving formal music training as a child eventually led to a diploma in piano performance.

In 2016, she graduated from HOGENT with a Professional Bachelor's degree in Interior Design. While gaining her first experience in the high-end interior sector, she developed a personal design style that transforms fresh ideas into timeless interiors.

A home is the place where people experience every kind of emotion, alone or together with others. It should be a safe haven and a true comfort zone. Interior design plays a crucial role in creating that sense of total comfort; it should feel like an extension of the person who lives there. Eveline works closely with each client's wishes to create fully customized interior designs. Her goal is to capture and strengthen her clients' ideas, both aesthetically and functionally.

Her vision and signature style can be described as "cozy chic." She believes in harmony achieved through calmness and balance, without sacrificing character or personality. On the contrary, distinctive material choices and refined aesthetic details help shape a unique identity for every space.

One of her projects involved the complete interior design of a penthouse located in the green heart of Ghent. For this full-scale design, harmony in material selection was the central focus. The surrounding environment needed to be both recognizable and tangible within the apartment. Soft sandy tones and cohesive materials came together to create a bright, airy overall atmosphere.

The project was realized in collaboration with several partners, including property developer Oryx and general contractor SYBO. The parquet flooring was provided by Parketline, the lacquer finishes by Lakkerij Vergote, the furniture by Design Oostende, and the window treatments by Cortitex.
